DOJ,

It would seem to me this suit has gone on long enough, and due to the extreme problems and pressures the nation is now facing, should be settled. I wonder if these 9 states are just holding out for "big bucks" and are not looking at the "whole picture" relative to how "we" people should be spending "our" time. I think Microsoft has made sufficient concessions, accommodations and commitments, which seem to be more than fair, to satisfy the "aggrieved". Please help the nation get on with the more important tasks at hand!!!
